EVERYONE GETS A SEAT UNDER THE STARS

Wheelchair Entrance & Novice-Dome™

Go-Dome™ Wheelchair Entrance

A standalone inflated vinyl entrance that welcomes wheelchair users without deflating the dome. Once inflated, it needs no further attention, so guests have easy, stress-free access.

- Standalone inflated vinyl entrance
- Minimal air loss while guests enter
- Easy, stress-free access for all
- Must be ordered with a standard entrance

Good to know: the Wheelchair Entrance is interchangeable with the standard airlock only when both are ordered together, because the two doors are aligned at the factory.

Novice-Dome™

Our most budget-friendly dome, and the simplest model to manufacture. It uses a single-zipper door, so the operator holds the door open and helps guests in and out. It is a good first planetarium for small groups and tight budgets, especially when turnaround time is not critical and a walk-in Go-Airlock™ is not required.

- Budget-friendly entry option
- Single-zipper door, operator-managed entry
- Best for small groups
- Ask your distributor for available sizes
